Alberta's International Exports
January - June 2003
Highlights

Overview: In the first half of 2003, Alberta's international exports grew 31%, compared to the first half of 2002, to $29.4 billion. This growth was largely the result of price driven increases for natural gas and crude oil exports. Two consecutive years of drought and international border closures to Canadian meat and live cattle has resulted in agricultural exports falling sharply because of lower beef, livestock, and wheat volumes. As well, California is phasing out the use of MTBE, an ether based gasoline additive, resulting in a $249 million exports loss.

Major Commodities: Natural gas and propane sales rose 79% and 40%, respectively, as higher prices more than offset lower export volumes. Crude oil exports rose 40%, as both volumes and prices increased. Export volumes of beef (fresh and frozen) and live cattle decreased 23% and 40%, respectively, as a result of border closures. Exports of polymers of ethylene, canola, refined petroleum (mainly diesel fuel) and nickel were sharply higher. Large decreases were registered for lumber, wheat, telecom equipment, coal and oriented strand board.

Exports by Industry: Exports by the mining & energy sector rose 60% because of higher prices for gas, oil and propane. Lower volumes caused a 27% drop in primary agricultural exports, led by declines in wheat, livestock and beef. Manufacturing exports fell by 8%, because of large declines in *food, feed & beverage*; *computer & electronic products*; *wood products*; and *transportation equipment*. The manufacturing sub-sectors registering the largest gains were *petroleum & coal products* and *primary metals*.

United States: Total exports to the US grew 36.3%, compared to the first half of 2002. Price driven increases in natural gas and oil exports are the primary causes of this sharp increase. However, declines in beef and livestock volumes stemming from the US border closure somewhat tempered this rise.

Asia: Exports to Asia decreased 2.3% from the previous year. Strong growth in Asian imports of canola, pork, telecom equipment and nickel was offset by large declines in wheat and coal exports. Imports into India, Pakistan and Taiwan increased strongly, but large declines were registered by South Korea, Indonesia and the Philippines. Exports to Japan decreased by 3.9% due to reduced coal, wheat and hay shipments.

Europe: Exports to Western Europe were 0.2% lower than in the first half of 2002. Increases in nickel and ethylene polymer exports were offset by declines in telecom equipment and coal. Exports to Belgium and the Netherlands increased sharply, while shipments to the United Kingdom, France, Germany and Italy declined. Exports to Eastern European countries rose 8.5%, led by substantial growth in Russian imports of oil and gas field machinery.

Latin America: Alberta exports to South America dropped sharply by 26.6%, compared to the same period last year, because of large declines in sales of wheat, and oil & gas field machinery. Central American imports fell 1.6% as a result of declines in beef and wheat imports. Exports to Mexico fell 8.7% as a result of declines in meat and milk power.

Other Regions: Exports to the Middle East fell 42.3% as a result of lower oil & gas field machinery exports. African imports from Alberta fell 10.3% as a result of lower wheat and durum wheat imports. Exports to the Oceania region rose by 15.6%, as a result of increased imports of ethylene polymers and pork products by Australia.

All other US States	986,772	777,894	-21.2%	1,930,747	1,724,692	-10.7%
Total Exports to the USA (excl. Oil & Gas)	**3,399,790**	**2,719,547**	**-20.0%**	**6,639,124**	**5,776,328**	**-13.0%**

* Exports to individual states can be seriously over- or under-stated, because energy exports, such as crude oil and natural gas, cannot be allocated to the state of final destination. For example, exports to Washington are overstated and to California understated.

** Excluded commodities include: Crude Oil, Natural Gas, Propane, Butane and other Natural Gas Liquids

* Exports to individual states can be seriously over- or under-stated, because energy exports, such as crude oil and natural gas, cannot be allocated to the state of final destination. For example, exports to Washington are overstated and to California understated.
